## Non Woven Bag Handle Loop Machine ( Double Head ) (SE-60LD)

### Summary

The Nonwoven tote bag handle loop machine weld hands pull to the bag directly by using ultrasonic principle. Pneumatic device to insure Welding quickly if switch step down, beautiful and stable welding point, Design all kinds of welding dark fringe if you required. Adjusting welding width is available within the mould's length. Length of hands pull is not limited, starting up working directly without preheat, high efficiency, only two persons could operate this unit for enhancing efficiency and deduce labor..

## Technical Data

Model	SE- 60LD
Brand	Sheetal Sonic
Technology	Ultrasonic
Accuracy	Good
Efficiency	Excellence
Voltage	50/60HZ, 220VAC/10A
Power	2500Watt
Frequency	18Khz
Weight	150KG
Dimensions	1200x550x1200mm
Production	8pcs/min

## Functions and Features

- Improved design optimal performance.
- Japan imported transducer, strong and stable output.
- Titanium transducer, longer useful life.
- Automatic compensation circuit of frequency modulation and frequency.
- Set the soft start circuit debugging, to avoid damage to the mold.
- The whole machine body processed by CNC tool, high precision.
- Adjustable floor structure, debugging mold conveniently.
- Welding, high efficiency, low non-performing
- Welding, high efficiency, low non-performing

Ultrasonic welding and also played a decorative role, strong cement, waterproofing effect can be achieved; clear embossed surface has a three-dimensional relief effect  
Various machine parameters can be accurately set, the precise welding time to ensure better welding effect Ultrasonic
