## Non Woven Bag Handle Loop Machine ( Single Head ) (SE-60LW)

### Summary

The Nonwoven tote bag welding machine weld hands pull to the bag directly by using ultrasonic principle. Pneumatic device to insure Welding quickly if switch step down, beautiful and stable welding point, Design all kinds of welding dark fringe if you required. Adjusting welding width is available within the mould's length. Length of hands pull is not limited, starting up working directly without preheat, high efficiency, only two persons could operate this unit for enhancing efficiency and deduce labor

## Technical Data

Model	SE- 60LW
Brand	Sheetal Sonic
Technology	Ultrasonic
Accuracy	Good
Efficiency	Excellence
Voltage	50/60HZ, 220VAC/10A
Power	1200Watt
Frequency	20Khz
Weight	100KG
Dimensions	1200x550x1200mm
Production	8pcs/min

## Functions and Features

- Improved design optimal performance.
- Japan imported transducer, strong and stable output.
- Titanium transducer, longer useful life.
- Automatic compensation circuit of modulation and frequency.
- Set the soft start circuit debugging, to avoid damage to the mold.
- The whole machine body processed by CNC tool, high precision.
- Adjustable floor structure, debugging mold conveniently.
- Welding, high efficiency, low non - performing
- Welding, high efficiency, low non - performing
